problems/Diabetes Eritrea
Knock out (D.E.K.out Project)
3. Subject: Request for Development Assistance
4. Project Areas: Management of Urinary health problems and diabetes
5. Authority: Government of the State of Eritrea/MOH
6. Date of Entry: July, 2013

A. Purpose of the project

To renew the existing partnership of cooperation between the three partners indicated above that is. between the Ministry of health of Eritrea, As.Me. V.Calabria and ASSITER. Both parties agreed to continue their cooperation in the areas of Urology, Nephrology and control of Diabetes Mellitus including its complications in Eritrea.

B. Objectives of the project

The ASSITER ONLUS and the As. Me. V. ONLUS, each for its own competence and possibility will assist the Ministry of Health of the State of Eritrea in its endeavour to improve the quality of health care provision, especially in the management of Urology and Nephrology health problems including the management of diabetic cases and their complications through the following assistance:

1. Strengthen the institutional set up and quality of care of the nephrology and Urology medical services at the Orotta National Referral Hospital and other nearby health facilities;;
2. Ensure the presence of specialized medical personnel (nephrologists, diabetologist, urologist and vascular surgeons) on a regular basis.

3. Provide the necessary medical equipment, medicines, and other consumables for the institutional set up of the project on nephrolog/c and urologic problems.
4. Provide technical training for higher and middle level/ health professionals on the management of acute and chronic nephrology and urology health problems including diabetes and its complications;

5. The courses are taught by Dr. Roberto Pititto, nephrologists. Dr. Maria Ferraro, diabetologist, Dr. Giovanni Amendale, nephrologists, for the Diabetes project and by Dr. Salvatore Galanti, urologist, for the urinary stones and other related components of the urinary system problems.

C. The Ministry of Health of the State of Eritrea will ensure:

The provision of necessary space and also to some extent support the project with its own resources (laboratory tests and radiology) for both the diabetic cases and urinary stones including other related complications of the urinary system.

D. Contact Person

Dr. Yemane Sium will be the contact and responsible person for the project from the Ministry of Health aspects and whenever there is a need of assigning exclusively one person for this project, it could be done as required.

E. Duration of the project:

The project is scheduled to last two years, starting from the date it is signed by both parties *
